

## INSTRUCTION FILE

- Run the command prompt as an administrator in Windows to open the jar file named **Uninformed\_Search**.
- Give the path to the jar file with the -cd command. Example: C:\Users\oguzh\OneDrive\Documents  
//Example command : cd C:\Users\oguzh\OneDrive\Belgeler
- After going to the desired path, run the command “ java -jar Uninformed\_Search.jar ” and the application will run successfully on the Command Prompt.
- If you wish, you can directly load the java project into an IDE and run it through it.
